Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

99

Volume ~~XCVIIII~~

January to June, 1932

McGRAW-HILL PUBLISHING COMPANY, INC.
330 West 42d Street
NEW YORK CITY

General Alphabetical Index

1 to 72.....Jan. 2
73 to 116.....Jan. 9
117 to 160.....Jan. 16
161 to 204.....Jan. 23
205 to 248.....Jan. 30
249 to 292.....Feb. 6
293 to 336.....Feb. 13
337 to 380.....Feb. 20
381 to 424.....Feb. 27
425 to 468.....Mar. 5
469 to 512.....Mar. 12
513 to 552.....Mar. 19
553 to 592.....Mar. 26
593 to 632.....Apr. 2
633 to 672.....Apr. 9
673 to 712.....Apr. 16
713 to 752.....Apr. 23
753 to 792.....Apr. 30
793 to 832.....May 7
833 to 872.....May 14
873 to 912.....May 21
913 to 968.....May 28
969 to 1000.....June 4
1001 to 1040.....June 11
1041 to 1072.....June 18
1073 to 1104.....June 25

(Ed.) Editorial. *Illustrated. (N) News.

A

Accidents and Accident Prevention:

Breakers explode at Waukegan station (N) 348 (N) 384
Cave-in hazards avoided in underground construction 488
Compressed air safety in underground construction (N) 529
Decentralizes responsibility for operating procedure. George Towar..... 850
Gas hazards in underground construction 582
How Toledo Edison cut accidents 90 per cent. A. Hoefle..... *826
Ohio substation dynamited (N)..... 882
Safety competition between Boston and Pittsburgh (N) 260
Safety promoted by engineering design. A. L. Colligan..... *462
Unsafe practices in field 736
Accounting—Los Angeles Bureau accounts (N) 392
Wisconsin makes accounting serve expeditious regulation 403
Advertising—Free window dressing for electrical dealers (N) 393
Advertising vs. publicity. Dempster MacMurphy 231
Advertiser's first qualification integrity (Ed) .645

Air Conditioning:

Air conditioner unit (N)..... *302
Air cooling unit, portable..... 1000
Bright spots in power sales..... 954
C. & A Pullman train air cooled (N).. 554
Comfort chart for air conditioning...1100
Convention meeting rooms (Ed)..... 1083
Domestic air conditioning. W. M. Timmerman 854
Heat pump or reversed refrigeration cycle used in California building (N) 349
Heat pump or reversing the refrigeration cycle to warm buildings (Southern California Edison Co.)..... *502
Interest in air conditioning (Ed.).... 524
Market exceeds refrigeration? (N).... 561
Means "cold" control (Ed) 308
Railroad car equipment 592
Reaching mass demand (N)..... 303
St. Louis—air-conditioning bureau proposed (N) 883
Serves many diverse fields (N)..... 763
This air-conditioning business. W. J. Kyle 90
Unit for home use 116
Air density correction factor chart. J. N. Arnold 99
Airport dispatching..... *1091
Airship "Akron" electrical equipment (N) *75
Airships—instrument board marks irradiated for safety 872
Alloy, low-melting point 71
American Bureau of Welding—to study problems (N) 481
American Gas Assn.—Education campaign for gas utilities (N) 478
American Engineering Council (Ed) 1050—Report on achieving economic balance (N) 162

American Institute of Electrical Engineers:

Annual convention (N)..... 206
Convention *266
Convention combines altruism and practicability (Ed) 262
Convention at Cleveland (N)..... 1073
Debate should be non-commercial (Ed) 263
Great Lakes District meeting (N).... 516
Providence meeting (N) 837
Reliability and economy in operation of large systems..... 1084
American Standards Assn.—Move for noise measurements (N) 349
American Statistical Assn. & American Economic Assn.—Meeting — equities as trust investments (Ed) 262
American Welding Society—Ductility problems topic at meeting (N)..... 796
Ammonia, dissociated..... 1104
Ammonia, liquid anhydrous, dissociated.. *512
Annunciator assembly using telephone apparatus. H. P. Currin *859

Appliances:

Anti-merchandising moves in different states (N) 428
Birdseye view of market for sunlamps. 731
Consignment merchandising a questionable plan (Ed) 970
Department store merchandising (N). 472
Financing plan for installment sales (N) 559
Group sales in operation 949
Home electrification, new style, to begin at once (N)..... 555
Home markets lure appliance makers (N) 75
Insist on use of approved motors. L. L. Elden *570
Installment-payment plan for combination of appliances (N)..... 521
Kansas newspapers deprecate ban on merchandising (Ed) 440
Legislation vs. co-operation on utility appliance selling. W. H. Hodge... 415
Lincoln, Neb., stops merchandising (N) 304
Local trade relations (Ed)..... 87
Market for money-saving equipment for the home (N)..... 884
Massachusetts and Mississippi have anti merchandising bills (N)..... 167
Maximum distribution of electrical appliances. P. A. O'Connell..... 1031
Merchandising co-operation in action.. 959
Multiple product sales (Ed)..... 564
Multiple sales plans gain acceptance (Ed) 605
Oregon hearing on merchandising (N) 295, (N) 428
Oregon Utilities Commission to investigate central-station sales (N)..... 128
Percentage of homes equipped with appliances 1017
Philadelphia Electric outlines merchandising policy (N) 342
Plan for complete new residence equipment sales (Ed) 685
Possibilities in the electrical market.. *952
Promise of the domestic load (chart). 69
Pushing the domestic business..... 1099
Residential customer used 10,000 Kw.-hr. per year and 26 appliances. D. W. Taylor *152
Sales 1914-1929 38
San Antonio Public Service Co. forbidden to merchandise (N)..... 209
Sell the home, not the appliance.... 688
Selling 1,500 major appliances at Brockton in a depression year, 782, (Ed) 845
Trade relations and appliance marketing. T. K. Quinn 178
Utility undertakes sale of used appliances (N) D74
Vacuum manufacturer says utility companies help retail sales (N)..... 641
Westinghouse concentrates on household appliances (N)..... 801
Appliances, see also Clocks, Heaters, Ranges, Refrigeration, Washing machines.
Appliances, see also Public utilities and Merchandising.
Artificial respiration. S. R. Benedict.... 140
Association of Electragists International—Aim to establish all metal standard wiring (N) 520
Association of Iron & Steel Electrical Engineers—convention (N) 1076
Associations: Directory of electrical associations 72
Status of the local leagues (Ed).... 805

Australia:

Australia — Anglo-American electrical activities (N) 302

Awards:

Coffin awards for 22 General Electric men (N) 640
Edison and John Fritz medal presented at A. I. E. E. *266
John Scott awards (N) 1081
Popular Science Monthly award to Irving Langmuir (N) *428
Steel bank checks for welding prize (N) *1081
Swope receives gold medal (N)..... 876
Washington award to W. D. Coolidge (N) *428

B

Battery train runs daily (N) 882, *478
Battery, British alkaline, uses zinc negative (Drumm battery) 694
Battery, storage, new type in France (N)..1081
Baylies, Walter C. (N)..... 714
Bearing—oil seal withstands liquid pressure 468
Behrend, Bernard Arthur (Ed) 605
Belting standards changed (N)..... 521
Blind can "see" black and white pages.... 632
Blower, motor driven, prevents frost in orchards *112

Boilers:

Boilers operate at 440 lb. in Hudson Ave. station of Brooklyn Edison... *356
Economical generation *934
Hartford mercury unit in operation (N) 563
Slagging of boilers reduced by studded tube screens *696
Studded tubes reduce depreciation (N) 643
Stud-tube walls in regular production. 712
20,000 kw. boilers supply process steam (N) 1081
Book reviews 244, 332, 548, 628, 747, 788, 868 998
Broadcasting: See Radio.
Brooklyn Edison Co.—election of Parker (N) 250
Brush, non-resilient, betters commutation. 752
Budget for 1932 for utilities 53

Busbars and Buses:

Bus spacings and ground clearances.. 136
Carrying capacities of inclosed buses. A. P. Fugill *539
Comparison of substation grounds. Morton & Payne *695
Stagered bus sections *191
Bush, Vannevar *567

Business Condition:

History repeats itself. J. E. Zimmermann 1097
Manufacturing leaders comment on business—symposium. Kerr, Swope, Merrick, Matthews, Falk, Robertson, Young 27
New England Council seeks to improve business methods 650
Time to do and dare (Ed)..... 482

C

Cables:

Cable rollers speed conductor stringing *418
Cable service uninterrupted though channel is dredged. A. W. Milliken. *489
Changes in marking of armored cable (N) 12
Corridor manholes serve as cable room. *99
Dead-end service clamp protects cable. *712
Improved joints can reduce cable failures (N) 1049
Key West-Havana telephone cable... *272
Proof testing of cables justified. C. H. Smith *137
Reeling oil filled submarine cable (N). *340
Rubber covered drag cables repaired by vulcanizing *182
66-Kv. three conductor cable joint. E. F. Neuzel *106
Submarine cable laid under Columbia River (N) *874
Telephone cable laid by plow-trench method (N) *173
Wedge-grip anchorage for service cables 912
Calenders synchronized for paper production. C. W. Drake *615

Canada:

Bridge River plant tunnel ready (N)... 522
Construction in Ottawa district (N).. 522
Electrical statistics.....82, 300, 433, 1046
Electrical supplies industry 501
Hydro-electric construction in 1931.. 703
Hydro scandal denied (N)..... 556
Power taxes (N) 522
St. Lawrence agreement impending (N). 637
Sherbrooke, Quebec, to have hydro plant (N) 562
Winnipeg River rentals (N) 480

Engineering
Mahr

Canadian Electrical Assn.: Meeting (N) 1008 1080
Capacitors, oil-filled 672
Casting, vacuum, improved 505
Cathode-ray records selectively sensitive (N) 217

Central Stations:

Customers by sections (table)..... 49
Energy in central stations and revenue (table) 22
Monthly operations, 10, 170, 388, 579 741 901
Operating and maintenance expenses (tables) 21
Possibilities in the electrical market..*952
Revenue and distribution (tables).... 18
Steam vs. electric auxiliaries discussed at A. I. E. E. 273
Charts: Results of attempts to regulate frequency and tie-line loads 893
Chicago to have electrical exhibit in 1933. 997
Chicago World's Fair buildings (N).....*554

China:

Developments in electrical industry. Tsung Han Chen *319

Circuit Breakers:

Assured power supply for Lincoln Liberty building in Philadalphia. W. F. McCarter *778
Automatic breaker reclosure prognosticated. A. I. E. E. meeting..... 270
Battersea circuit breaker of 20 tons..*871
Breakers used exclusively for feeder and branch circuits 453
Code revision sought for domestic breakers (N) 203
"Deion" low voltage circuit breaker..*552
Fittings and panelboards 592
Guarding against loss of field. E. H. Bancker 983
Instantaneous reclosure for service (Ed) 806
Minimizes emission of oil 792
Oil breaker theory debated at A.I.E.E. 282
Protection against failure to remove field. E. H. Bancker..... 849
Sectionalizes power supply for operating breakers (Harding St. Station)..*238
Steam circuit breaker (N)..... 173
Steel cells isolate breakers in city substation *572
Tuning fork and stylus show circuit breaker speed. R. E. Rowley, Jr..*814
Urges domestic breakers supplant fuses. W. M. Sullivan 907
Water-type breakers used at Barmen, Germany (N) 349
Cities Service Building opened (N).....*876
Clip, guy wire 1104
Clocks: Gearless clock motor based on Vernier cascade. T. R. Watts.....*784
Outdoor electric (N) *562
Clocks and time service at A. I. E. E.....*270
Clutch, double disk 424
Coal: Calculating savings from power interchange. E. C. Brown *367
Mill pulverizes 54 tons of coal per hour *316
Code revision on interim sought (N)..... 881
Color theater in electrical association exhibit *967
Comerford, Frank Dowd *727
Compressed air safety in underground construction (N) 529

Condensers:

Capacitors to save cost in less than two years. E. W. Stone.....*984
Coupling condensers provide directional relay current. A. V. Joslin.....*145
Hydrogen-cooled condenser reduces operating costs. C. E. Schnell.....*458
Outdoor condenser, inclosed (N).... *74
Relays operated from bushing potential devices. Langguth & Jones.....*1092
Starting condenser for capacitor motors 832
Steam plant using chlorine treatment of condensate water *856

Conduits:

Designs of conduit for low and high tension cables *872
Connector, single unit 336
Construction cost index for light and power 318
Contact resistance reduced by mercury vapor (N) 349
Contractors and labor 573

Control:

Attempts to regulate frequency and tie line loads (chart) 893
Automotive valve production have electronic control (N)..... 563
Dialing controls signals on power supervisor's board *507
Flashing lamps without moving parts. C. G. Suits.....*1098
Frequency, time and load control in interconnected systems. Sporn & Marquis *495
Ivanhoe substation of Appalachian Electric Power Co. has supervisory control *243
Ore bridge controlled electropneumatically (N) 305
Paper production aided by synchronized super-calenders. C. W. Drake....*615
Press operated by thrustor and two hand control *958
Press outages prevented by sequence starting. L. F. Stone *188
Remotely operated pipe line pumping station. M. E. Reagan *321
Safeguarding and controlling sequence operations. R. H. Rogers *372
Simple control permits D. C. drive from A. C. power (N)..... 919
Subway substations to have supervisory control (N) 919
Supervisory control for Reading electrification. G. I. Wright *454
West Penn Power Co. standardizes A. C. distribution cubicles. Langstaff & Brown *226

Control Devices:

Annunciator assembly using telephone apparatus. H. P. Currin *859
Benchboard for airport dispatching..*1091
Bridge type and pendulum type of controllers for frequency. Sporn & Marquis *618
Centralized controls simplify station operation. E. M. Gilbert *410
Circuit terminal boxes serve switchyard *447
Clock controlled constant frequency generator (N) 261
Dialing controls signals on power supervisor's board *507
Electric sign control (N).....*762
Electron tube used for heat control (N) 563
Flexible window lighting. K. A. Piez.*198
Holland Tunnel lights controlled (N).*162
Load ration control for small transformers 552
Push button station of pendent type..*248
Safeguarding and controlling sequence operations. R. H. Rogers *372
Split-second supervisory control with two wires.....1104
Synchronizing conveyors by photocells and selsyns. W. B. Snyder.....*327
Thrustors applied to embossing press. E. B. Lovewell *815
22 applications for interlocking systems 538
Used in tunnel building (N)..... 393
What kind of interlocks desirable?... 781

Cooking—Electric:

Black-bottom utensils aid electric cooking. A. S. Loizeaux 997
Fry kettle *103
Cooking—electric, see also Ranges-electric.

Copper:

Electrolytic winning of copper advanced by cheap power. W. E. Greenawalt. 864
Copper, oxygen-free (N)..... 173
Copper survey (N)..... 82
Corrosion—pitting of hydraulic turbine runners. A. H. Myers *328
Cortelyou, George B. *1029

Costs:

Calculating savings from power interchange. E. C. Brown *367
Construction cost index for light and power 318
Demand metering deserves more prominence. A. E. Knowlton.....*697
Factors affecting plant first cost. F. S. Clark 531
Future cost of power. A. G. Christie 95
Hydrogen cooled condenser reduces operating costs. C. E. Schnell....*458
Network and radial systems compared. 446
New Hampshire utility costs analyzed. 457
Reliability and economy in large systems discussed at A.I.E.E. meeting..1084
Stretching the purchasing dollar. E. T. Gushee 611
Underground vs. overhead distribution for residential areas 411
Wisconsin makes accounting serve expeditious regulation 403
Couch, Harvey C. *767
Cranes: Crawler Crane *155
Customer ownership: Invest $150,000,000 40

Czechoslovakia:

Electrification (N) 476

D

Dams:

Ariel hydro development. Clogher & Merrill *442
Bleiloch Dam in Germany (N).....*166
Diablo Dam completion pushed (N).. 757
Hardy Dam development *412
Hoover appropriation cut (N)..... 1080
Hoover Dam—Air conditioning in offices (N) 977
Hoover Dam power contracts signed (N) 41
Hoover Dam site overflows (N).....*472
Hoover dam work faces delay by cut (N) 720
Rock Island Dam may be raised (N).. 722
San Gabriel dam facilitated (N).... 682
Tennessee power dams of no power interest (N) 165
Texas-Colorado Dam in receivership (N) 802
Derrick, telescoping, for poles.....*1104

Dielectrics:

Dielectric research progresses (Ed).. 352
Predetermination of dielectric characteristics. A. I. E. E. discussion.... 268
Predetermining dielectric characteristics. Whitehead & Banos *285
Theories (Ed) 565
Diphenol-water station 934
Dissociator for ammonia.....1104
Dissociator for liquid anhydrous ammonia.*512
Distribution: Maximum distribution of electrical appliances. P. A. O'Connell..1031

Distribution Systems:

Analyzing system disturbances with automatic oscillograph. G. A. Powell*732
Application of primary distribution fuses. F. E. Sanford.....*654
Assuring system stability and service continuity by relays. H. D. Braley.*310
California sets example in common-neutral practice (Ed) 978
Common-neutral practice confirmed in California 980
Construction of Boston traffic tunnel. A. L. Banion *1065
Cross feeding between substations aids service continuity *771
Customer service determines system development (Hudson Ave. station of Brooklyn Edison). H. R. Woodrow. 888
Distribution advancing rapidly 937
Energy loss in distribution copper no longer negligible (Ed) 175
Ford Motor Co. at Richmond, Calif., laid out on watt per square foot basis *1070
France to interlink various networks.*824
Kind of interlocks desirable?..... 781
Lightning troubles on distribution systems 280
Network and radial systems compared 446
Overhead secondary network next move in distribution. W. R. Bullard 745
Overhead secondary network offers real economy. Parsons & Olmsted..... 803
Providing reliability in a 770,000 kw. station (Hudson Ave. Station of Brooklyn Edison) Fairman & Gilt.*894
Relays operated from bushing potential devices .....Langguth & Jones *1092
Reliability and economy in large systems discussed at A.I.E.E. meeting..1084
Simplicity in distribution substation design *506
Stability of transmission systems discussed at A. I. E. E.....*276
Table of largest generating and distributing systems in North America. Supplement May 7.
22 applications for interlocking systems 538
Underground vs. overhead distribution for residential areas 411
West Penn Power Co. standardizes A. C. distribution cubicles. Langstaff & Bowen *226
Diving bell driven by electricity (N)....1009
Dredges, suction, use turbo-electric power (N) 1081
Drive, short center with new base..... 71
Drumm battery adapted to transport (N).*478
Drumm battery uses zinc negative..... 694

E

Earth boring machine 632
Economic balance report (N)..... 162
Edgar, Charles L. (Ed) 724 (N)..... 674
Edison, Thomas A.—proposed memorial (N)*338
Electric light and power companies, earnings, reports 11, 127, 168, 258, 432, 518, 600, 678, 760, 838..... 931
Electrical Assn. of New York: Lighting conference (N) 1009
Electrical Assn. of Philadelphia: Creates dealer division and retail merchapdising bureau. G. R. Conover.....*966
Retail merchandising bureau to be established (N) 642
Electrical Contractor-Dealers of Minnesota and North Central Electric Assn.—meeting (N) 252
Electrical Contractors' Assn. Rehabilitated (N) 802
Suit against officers and electrical unions (N) 517
Electrical World—historical summary 7
Electrocardiographs detect heart beats. S. R. Benedict 140
Electrochemical Society meeting (N)..... 755
Electrochemistry discussion at A. I. E. E.. 269
Electrolytic winning of copper advanced by cheap power. W. E. Greenawalt..*864
Electron tubes used in telemeter. A. J. Johnston 1089
Electronic timing device for welding service *468

Electrons path traced by spectrograph (N) *481
Elevator doors protected by photo-cells. C. E. Ellis, Jr. 464
Elevators: Operation of elevators on A. C. networks. Anthony Pinto *704
Radio City contract for elevators (N). 476
Embossing press actuated by thrustors. E. B. Lovewell *815

Employees:

Decentralizes responsibility for operating procedure. George Towar. 850
Electric Bond and Share explains its employee stock plan (N) 839
General Electric employees contribution toward the unemployed (N) 478
General Electric employees plan for unemployed (N) 1007
General Electric pays for suggestions (N) 347
General Electric spreads available work (N) 521
Mechanization creates employment. J. S. Thomas 1034
Mutual unemployment benefit plan (Ed) 884
N. E. M. A. adopts plan for unemployment (N) 881, 902
Utilities and the public welfare. F. L. Carlisle 1052

Energy:

Baltimore consumers taking more energy (N) 214
Consumption rises when rates shrink (N) 476
Data on energy given by 172 large systems (charts) *818
Distribution and revenue for central station energy (tables) 18
Electrical energy generated in all classes of electric utility plants (table) 64
Flour mills and power data. 501
Horizons of recovery. Virgil Jordan. 41
Italy's electrical output increasing (N). 1078
Possibilities in the electrical market. *952
Production abroad rises (N) 758
Production in 1931 2 (N) 302
Regional energy co-ordination an accomplished fact. A. H. Dyckerhoff. *542
Regional energy co-ordination embraces steel, gas power industries. A. H. Dyckerhoff *406
Revenue and energy in central stations (table) 22
Revenue and energy per customer, by classes (chart) 18
Steel plants have regional energy potentialities. A. H. Dyckerhoff. *449
Typical domestic energy use (table). 68
Utility ties valuable to steel plants. A. H. Dyckerhoff *491
What the figures show (Ed) 844

Engineering:

Engineering bombs await fuses (Ed). 921
A function in business readjustment. J. C. Parker 1025
Industry faces new problems in next expansion. A. H. Kehoe 1033
Simplicity versus complexity in engineering (Ed) 87
Specifications, guarantees, free consultation? M. M. Samuels. 109

Engineers:

Opportunity for engineers to save money (Ed) 564
Unemployment committees aid 696 engineers in N. Y. 452

Equipment:

Burdensome allowances for second-hand apparatus (Ed). 1051
Equipment data sheets for purchasing. R. C. Wenz *146
Excavator, conveyor-type (N) *85
Expansion tank and relief device. 872
Exports: Foreign trade plays minor part (Ed) 219
Thirty years of exports (chart) (N). 1047
Exports of electrical equipment 171, 259, 640, 680, 840 1079

F

Fan, electric, noiseless and vibrationless (N) *258

Federal Power Commission:

Alabama Power Co.'s prelicense account (N) 77
Clarion River case (N) 792
Florida firms to have inquiry (N). 762
Lockport application for Niagara River power (N) 253 (N) 436 (N) 471 (N) 918
Niagara Falls Power hearings adjourned (N) 210
Smith case (N) 348
Special attorney appointed (N) 3
Supreme Court. G. O. Smith (N) 602. (N) 796
To extend its activities (N) 517

Federal Trade Commission:

Arkansas Power & Light Co. examined, also Mississippi Power & Light Co. (N) 597
Central Illinois inquiry (N) 919
Florida Power Corp investigation (N) 429
Georgia Power & Light inquiry (N). 677
Louisiana Power & Light Co. inquiry (N) 877
Miscellaneous transactions (N) 715
National Electric Power Co. evidence (N) 251 (N) 296
Nebraska Power Co. inquiry (N). 515
New England Public Service Co. inquiry (N) 555
North American Company inquiry (N). 119
Northern States Power Company inquiry (N) 797, 835
Reduced appropriation (N) 427
Simultaneous examinations (N). 1041
Tide Water Power contract inquiry (N) 340 (N) 386
Ferry, electric, driven by power company supply (N) 1049

Finance:

Balancing the budget is a two-sided problem (Ed) 306
Bond market oversold? 80
Committee of twelve to employ reserve credit (N) 17
Credit endangered by financial practices of few. W. C. Gilman 134
Equities as trust investments (Ed). 262
Finance to the fore (Ed) 130
Improved conditions for financing (Ed) 804
Institutional investor registers a protest (Ed) 131
Insull moves for stabilization of Middle West Utilities (N) 634
Investigation of investment trusts (Ed) 482
Investment companies writing down securities (N) 79
Line construction financing plan (N). 347
New York State security issue privileges to be re-examined (N) 211
1931 utility financing (tables and charts) 55
Price trend of power and light stocks weekly.
Public utility maturities in 1932. 80
Stocks back to 1925 prices 60
Teleregister brings stock exchange to office (N) *76
Thirteen holding companies analyzed and compared 928
To increase the revenue per dollar invested. T. O. Kennedy 1039
"Write-downs" will lead to better security markets (Ed) 524

Fire Protection and Prevention:

Fire alarm *467
Fire alarm, panic proof (N) 883
Fire prevention—Mill and Elevator Code (N) 347
Fire protection—urges domestic breakers supplant fuses. W. M. Sullivan 907
Fire service truck with floodlighting. *551
Floors welded 1072
Flour mills and power data 501
Fire service truck with floodlighting. *551
Fog hazards lowered by energized cables (N) *642
Ford Motor Co. at Richmond, Calif., laid out on watt per square foot basis. *1070

France:

Brommat and Sarrans to have hydro plants (N) 677
Sets quotas for electrical imports (N) 212
Steel concrete poles used on Savoy line. *731

Frequency:

Regulation and the line loads (chart). 893
Tie-line load control. Sporn & Marquis *618
Time and load control on interconnected systems. Sporn & Marquis. *495
Frequency changer. A. W. Forbes. *192
Frequency checker 116

Rural service needs selling. S. R. McKelvie 1057
Service increases (N) 298
Session in New England on electrical farming (N) 636
Straightening a vicious circle (Ed).. 220
Texas farms need appliances (N) .. 436

Russia:

Dnieper River units planned (N).. 595
High pressure boilers ordered (N).... 680
Soviet progress in power production (N) 720

S

St. Lawrence River:

Agreement impending on Ontario development (N) 637
Dominion and province form plan (N) 836
New York State Power Authority report (N) 121
Official report of Power Authority (N) 517
Ottawa conferences held (N) 385
Sales. Products sales 37
Sales. See also Merchandising.
Sand molder improved by magnetic operation 512
Security issues 9, 598, 800

Service:

Customer service determines system development (Hudson Ave. station of Brooklyn Edison) H. R. Woodrow. 888
Continuous service imperative in construction of Boston traffic tunnel. A. L. O'Banion *1065
Door-to-door surveys practicable (Ed) 395
Economics controls service extensions (Ed) 765
Extending service from Bagnell (N).. 802
"I. O. U.'s" of unemployed patrons taken at Hartford (N) 877
Interruptions caused by unusual events 993
Massachusetts defeats service charge (N) 594
Massachusetts includes service charge in rates (N) 634
Michigan expansion in 1931 (N) 480
Specifications, guarantees, free consultation? M. M. Samuels 109
What is continuous service worth? (Ed) 886
Shovel, electric, for mining (N) *305
Sign receptacles 592
Signs, weatherproof *752
Skinner, Charles E. *265
Sloan, Matthew S., resigns from N. Y. Edison (N) 207
Smith, Harold Babbitt (Ed) 350
Smoke concentration measured. Simon & Kron *576
Society for Electrical Development (Ed).. 175
Industry co-operation has broken down —what next? (Ed) 220

Standardization:

Clean coal specifications asked (N) ..1074
Insulator committee approved (N) .. 6
International standard for water power 225
Lamp socket standard approved (N).. 390
Manhole frames and covers—standards suggested (N) 214
1932 Standards Yearbook (N) 881
Pole dimension tables (N) 390
Pole handbook for stresses of wooden poles (N) 881
Standard parts aid apparatus development (Ed) 307

Starters:

Starter, cubicle, for synchronous motors *832
Explosion-proof starters *71
Magnetic *336
Two-function automatic and semi-automatic starters 632

Steam:

Analysis of steam station costs. F. S. Clark 531
Economize by modernizing stations (Ed) 176
Electric vs. steam auxiliaries discussed at A.I.E.E. 273
Future cost of power. A. G. Christie. 95
Greater efficiency in steam—1.56 lb. of coal per Kw.-hr. (Tables and Chart) 63
Purchased power has place even in process-steam industries. R. M. Hibner 857

Steel:

Plants find utility ties valuable. A. H. Dyckerhoff *491
Plants have regional energy potentialities. A. H. Dyckerhoff *449
Plants—regional energy co-ordination. A. H. Dyckerhoff *406
Plants—regional energy co-ordination an accomplished fact. A. H. Dyckerhoff *542
Silicon, value in electrical industry (Ed) 396
Stoker, Riley 292

Substation:

Advantages and disadvantages of four types of outdoor substations 655
Avon, California, substation has multicircuit riser *993
Commonwealth Edison stations at Kedzie Ave. and Garland Court (N) ..*296
Comparison of substation grounds. Morton & Payne *695
Consumers Power builds modern Croton substation (N) 83
Cross-feeding between substations aids service continuity *771
Denver Avenue substation in Tulsa, Okla. Grigsby & Woodruff *149
Economy of copper vs. apparatus (Harding St. Station) *183
Faraday Street substation of Worcester Electric Light Co. has steel-cell construction *572
Galvanized vs. painted structures for outdoor stations 366
Hillside substation at Lynch, Ky. (N) *1003
Hydrogen-cooled condenser reduces operating costs. C. E. Schnell *458
Ivanhoe substation of Appalachian Electric Power Co. has supervisory control *243
Low-cost pole substation for rural community *225
Metal-clad substation for restricted mill yard *326
Oil-purifying systems for large or small substations *93
Photo-electric telemeters used on South Carolina Power Co. Johnston & Busby *414
Railway substations in New South Wales. N. Von Kotschubey *540
Relay scheme for preferential feeder control *375
Rotterdam substation of N. Y. Power & Light uses automatic oscillograph. G. A. Powell *732
Rural type substation proves its economies (N) 603
Sewickley substation of Duquesne Light Co. F. S. Brown *860
Sierra Pacific Power Co., Reno, Nev., serves low-density area *1088
Simplicity in distribution design (Marshall station for Northern States Power Co.) *506
Single bent substation (Detroit Edison Co.) *279
Small devices important in performance of automatic substations 771
Staggered bus sections (Wendell Street station of Commonwealth Edison Co.) 191

Structure lowered by shortening towers (Dunwoodie Ave. Station) *490
Subway substation to have supervisory control (N) 919
Switching for spare transformer (Niagara-Hudson Corp.) *355
Three different substations *94
Toronto substation (N) *120
Transformer bank in Wausau substation of Wisconsin Valley Electric *317
Transformer hoist (Benton Harbor, Mich., Riverside substation) *195
Subways, New York, to have Westinghouse rectifiers (N) *80
Sunlamp market 731
Surge diverters for distribution transformers*832

Sweden:

Lamp making. A. E. Fristedt *580
Transmission-line transpositions *578

Switches and Switching:

Combination fuse and disconnecting switch *752
Fuse-disconnecting switch for rural service *1072
Master switch to regulate control circuits 1104
Mercury electric switch 380
Mercury switch operated by magnetic control 792
Mercury switches used in tap changing abroad (N) 437
Metal clad switchgear. Grigsby & Woodruff *149
Metal-clad switching unit 672
Miniature switchboard (Zanesville substation of Ohio Power) *230
Miniature switchboard design. E. G. Bern *702
New conceptions of switchgear. R. Paxton *196
New York Subway switchgear. L. W. Bailey *315
Push-button control *792
Refractory protected mercury switch 204
Sectional design for steel switchboards*912
Single-pole toggle flush switch 71
Switch hook for safety 912
Time switch independent of temperature changes *160
Transformer-Switchgear for substations *592
Unit for motor-driven auxiliaries *71
Vacuum contact toggle switch 248

Switzerland:

Hydro-electric progress (N) 300

T

Tank car for transformer oil *890
Tariff may strengthen copper prices here (N) 1007

Tasmania:

79% load factor *821

Taxes:

Arkansas to have utility tax? (N) 128
Consolidated Gas to seek to add new taxes to rates (N) 382
Copper duty forced into bill (N) 842
Defining the basis of tax on energy (N) 387
Electricity tax before the House (N) 208
Export tax sustained (Ed) 130
Federal revenue bill puts sales tax on electricity (N) 470
Florida cities contest tax law (N) 597
Florida tax on utilities is excise not income tax (N) 717
Florida taxes increased by municipal utilities. W. A. Smith 239
Ford Hydro Company a utility (N) 216
Idaho—Supreme Court upholds taxation of interstate power (N) 874
Idaho energy tax sustained by Federal Court (N) 78
Idaho and South Carolina cases (N) 717
Indian utility taxation (N) 754
Indianapolis dispute (N) 522
Industry's attitude on electrical tax (N) 594
Internal Bureau rules on energy tax (N) 1075
Kentucky drops tax bill (N) 514
Kentucky proposes energy tax (N) 340
Kill kilowatt-hour taxation now (Ed) 218
Mississippi public plants not included in sales tax (N) 676
Mississippi sales tax becomes law (N) 834
Municipal utilities and taxation (Ed) 218
New Jersey executive seeks utility tax (N) 166
Ohio may have special session on taxes (N) 594
Ohio may tax power imported wholesale (N) 4
Ohio passes increased taxes (N) 636
Ontario considers taxing electricity production (N) 338
Philadelphia application of gross receipts tax (N) 842
Practical aspects of taxation on electrical energy (N) 433
Profit-sharing plan instead of kilowatt-hour tax? (N) 1044
Proposed tax on consumption of electricity attacked (N) 250
Revenue bill passes with 3% tax on electricity (N) 1002
Senate bill puts tax on receipts of power companies (N) 969
South Carolina Court defers ruling (N) 1076
South Carolina tax may be changed (N) 252
Taxation. G. T. Buckingham 1037
To kill an industry (Ed) 979
Utility taxes mounting faster than revenue 61
Washington, D. C., taxes (N) 1048
Will taxes nullify the good of credit measures (Ed) 438
Telegraphy—International communication advances 65
Telegraph reaches century mark (N). 882
Telemeter used on South Carolina Power Co. Johnston & Busby 414
Telemeter uses tubes and standard instrument parts. A. J. Johnston 1089

Telephone:

Demonstrated phases of inductive coordination (N) 763
International communication advances 65
Network installation safeguards telephone service *649
1931 accomplishments (Table and Charts) 43
Sales of apparatus 1914-1929 38
Some telephone equipment developments during 1931 ....*233
Trends in intercontinental radio telephone (Ed) 219

Television:

Television brings race to theater (N) .1009
Television limitations stated by R.M.A. (N) 683
Transmission on a light beam predicted (N) 217

Testers and Testing:

Composite-coil instrument to determine voltage, current and power 592
Double range insulation tester 632
Field tests cover 260 service years (N) 643
Ground tester measures connection resistance *116
Impulse testing with dynamic power connected. H. V. Putnam *660
Machine for testing nickel-chromium wire *711
Neon lamp to test frequency or polarity. F. H. Rogers *235
Proof testing of cables justified. C. H. Smith *137
Stray load losses determined by test ..*831
Surge generator to aid insulation coordination (N) 843
Surge tests given to energized transformers (N) 437
Tachometer for testing rotating machine speeds 1000
Temperature signal device 1000
Therapeutics, electrical, in industry. Sanford DeHart *816
Thermostat, direct break without a relay..1000
Thyratron tubes govern speed of line welding 468
Trailer meeting heavier demands *141
Trailer, portable transformer bank on. L. C. Garrison *990

Transformers:

Capacitance transformers for ground directional relays. F. B. Doolittle.*1057
Closed delta may be more economical than open. L. M. Grow *827
Discussion at A.I.E.E. 269
Economy of copper vs. apparatus (Harding St. Station) *183
Fritted glass filters clean transformer oil (N) 977
High voltage transformer for x-ray work *631
Hoist for transformers *195
Impulse testing with dynamic power connected. H. V. Putnam *660
Lightning protection for distribution transformers 912
Load-ration control for small transformers 552
Lowering device aids vault installation. D. M. Bunn *614
Malden installs network unit outdoors. *610
Matching ratio errors improves differential relaying. E. C. Wentz *154
Oscillator stabilizes, a.c. welding arc. J. B. Gibbs *405
Oil cooler serves transformer (N) *118
Pole-type transformers protected against lightning 336
Radio City starts with 13,000 Kva. capacity. Eugene Clute *656
Safe Harbor and Hell Gate transformers (N) *83
Self regulating distribution transformers? (Ed) 1082
Simple switching for spare transformers *355
Surge diverters for distribution transformers *832
Surge-proof distribution transformers. 672
Surge tests given to energized transformers (N) 437
Temporary services from transformer trailer. L. C. Garrison *990
Transformer bank in Wausau substation of Wisconsin Valley Electric. *317
Transformer-switchgear for substations*592
Unit mountings *632
X-ray transformers 712
Yarmouth, Enlgand, transformer station (N) *396

Transmission:

Air patrol for transmission line maintenance *309
Analyzing system disturbances with automatic oscillograph. G. A. Powell*732
Assuring system stability and service continuity by relays. H. D. Braley. *310
Bracing more economical than class A poles *533
Bus spacings and ground clearances.. 136
Cable rollers speed conductor stringing. *418
California—common neutral approved for 5 kv. lines (N) 720
Comparison of substation grounds Morton & Payne *695
Casper, Wyo., line planned (N) 436
Common-neutral practice confirmed in California 980
Co-ordinating insulation on high-voltage lines. E. W. Dillard *700
Cross-feeding between substations aids service continuity *771
Determining insulator swing and avoiding uplift. F. C. De Weese 905
Dummy power course as linemen's practice ground (N) 127
Economics of 300 mile multiple conductor line 1091
Effect of humidity on insulator flashover. G. M. Barrow *448
Energy loss in distribution copper no longer negligible (Ed) 175
German experience with arcing ground suppressors. Dr. A. Menge *362
Ground and distance relays the trend in practice *398
Grounding (Ed.) 132
Grounding clamp take off provides smooth path to earth. H. V. Ingersell *91
Hydrogen-cooled condenser reduces operating costs. C. E. Schnell *458
Illinois to have new high-tension line (N) 762
Line maintenance. J. H. Nichols 92
Line transportations in Sweden *578
Logarithmic plot facilitates copper loss studies. E. F. Anderson 744
Marking obstructions to flying (N).. 480
Multi-circuit riser structure designed for safety *993
Oscillograph records line performance (N) 563
Pole line assembled before being erected (N) 1042
Pothead, inverted, for outdoor use *160
Practices adopted for minimum investment, high reliability, low maintenance, future needs *944
Proof testing of cables justified. C. H. Smith *137
Radio complaint exposed hazard.....*817
Reducing transmission line radio interference. B. E. Ellsworth 199
Right of way clearing costs—tree-trimming report. J. H. Nichols 544
Safety promoted by engineering design. A. L. Colligan *462
Sectionalizing tower simplifies maintenance *284
Shooting line across canyon *527
Shooting power lines across canyons. E. Y. Porter *530
Substation structure lowered by shortening supporting towers *490
Symposium of A.I.E.E. on stability of transmission systems *276
Symposium on distribution circuit lightning protection 267
Tree trimming on a performance bases (Ed) 396
Trinity River crossing tower (N) *480
Tubes stabilize jumpers *105
22 applications for interlocking systems 538
Underground vs. overhead distribution for residential areas 411
Unsafe practices 736
Westchester line attacked by estate owners (N) 128
Westchester lines need not go underground (N) 755
Which line is grounded? Schafbuch & Works *281
Wood guy insulator utilized. H. V. Ingersoll *195
Trucks—8 cents per mile for trucks.....701
Lifting and tiering trucks *712
Tunnel, Boston traffic, serviced with electricity. A. L. Banion.....*1065

Turbines:

Multiple nozzle control improves turbine efficiency. J. D. Schmidt 229
Paris has 3,000 r.p.m. turbine (N).. 260
Pitting of hydraulic turbine runners. A. H. Myers *328
Problems of turbine design. C. R. Soderberg *772
Safe Harbor's four Kaplan turbines (N) *210
Single shaft generator in Hudson Ave. station of Brooklyn Edison *356

Starting without aid of heating (N). 305
Steam vs. electric auxiliaries discussed at A.I.E.E. 273
Turbo-electric ship sets Pacific record. *911
Turbo-generator added at Deepwater plant (N) 85
Typesetting machine operated by "electric eye" (N) *603

U

Ultra-Violet Rays:

Dairy experiment (N) 216
Detects trickery in painting (N).... *522
Dual purpose lighting assumes its rational status (Ed) 566
Effect of ultra-violet radiation upon the eye. M. M. Luckiesh 583
Efficiency test by Philadelphia Co. (N) 7
Electrical therapeutics in industry. Sanford DeHart *816
Hygienic value of ultra-violet radiation. J. H. Clark 104
Research in penetrating ultra-violet barriers (N) *523
Sunburn-tan-health. M. Luckiesh ... 453
Ultra-violet radiation and fading of materials. M. Luckiesh 890
Ultra-violet reflection factors. M. Luckiesh 330
Underfloor ducts of materials having magnesite base 752

Underground Construction:

Cave-in hazards 488
Compressed air hazards (N) 529
High voltage network vault *286
Safety from gas hazards 582
Traffic obstruction reduced while extending circuits *626
Transformer lowering device aids vault installation. D. M. Bunn *614
Transformers vaults in Radio City. Eugene Clute *656
Underground vs. overhead distribution for residential areas 411
Vault, network, for Verona network of Duquesne Light Co. *286
Unilets for hazardous locations 552

V

Vacuum casting improved 505
Valves, balanced plunger 672
Relay pressure valve for steam control *71
Vaults. See Underground Construction.
Vermont Electrical Assn. meeting (N) ...1008
Vibrations and strains determined (N) ... *723
Vibrator for internal compaction of concrete 1000

Voltage:

Co-ordinating insulation on high-voltage lines. E. W. Dillard *700
Correct motor voltage will reduce power bill. L. F. Leurey 228
Impulse testing with dynamic power connected. H. V. Putnam *660
Insulated shields improve limiting gap. A. O. Austin *584
Relays operated from bushing potential devices Langguth & Jones..... *1092
Surge tests given to energized transformers (N) 437
Survey points to closer feeder regulation. L. K. Koontz 986
Wattmeters give power factor on unbalanced load. G. W. Stubbings.. *823

W
